

The background of the slide is a night-time photograph of a city skyline, likely Dubai, featuring several illuminated skyscrapers. A large, semi-transparent white diagonal shape cuts across the image from the top-left towards the bottom-right. The OrbitX logo is positioned in the upper right area, within the white shape. Below the logo, the text 'OPPORTUNITY PRESENTATION' is written in a smaller, blue, sans-serif font. In the bottom-left corner, there is a graphic element consisting of several overlapping, semi-transparent geometric shapes in shades of blue and orange, creating a modern, architectural feel.

WHAT WE DO

**FOREX
ARBITRAGING**

**FUTURE
HEDGING**

INDEXING

**FOREX
TRADING**

REACH NEW HEIGHTS

When some brokers give you the tough sell, we're here to make your strategies work harder. We are here to support you every step of the journey because we want you to grow with you.

ArbitX bridges the gap between a common and a smart investor. It's a never before concept introducing trading-on-demand to the marketplace.

TRANSPARENCY

You decide when to allocate your funds and when to pull out of the cloud. Our global trade operations are active 24 hours, 365 days a year.

PROFESSIONAL

Specialized team profoundly studies and trades on your behalf generating returns that are not only fabulous but also aimed at long-term

FOREX ARBITRAGING

ARBITRAGING IS A SMALL WINDOW OF OPPORTUNITY

Arbitrage represents an opportunity for low risk profit. Though to make the most of an arbitrage trading strategy, there are various technical points that you should know.

Find out more (www.arbitx.com) about arbitrage and how it works.

We are by your side for every trade by combining lightning of fast execution speeds, raw spreads & low commissions with a genuine commitment to helping you achieve your trading goals. Trade with a prestigious broker and earn more continuously.

TRIANGULAR STRATEGY

Triangular arbitrage involves a fx trader by exchanging three currency pairs at three different banks with hope of realizing a profit through differences in the various prices quoted.

STATISTICAL STRATEGY

Statistical arbitrage is a group of trading strategies retaining large, diverse portfolios that are traded on a very short-term basis. This assigns stocks appeal ranking & constructs a portfolio to reduce risk as much as possible.

FUTURE HEDGING

Future hedging is a simple work around to protect your trading positions from making a loss. To prevent your market positions from losing money you construct a portfolio hedge by employing futures.

Why really hedge a position? You can imagine, a trader or an investor has a stock which he has purchased at \$100. Now he feels the market is likely to decline and so would his stock. Given this, and choose to do one of the following:

- Take no action and let his stock decline with a hope it will eventually bounce back
- Sell the stock and hope to buy it back later at a lower price
- Hedge the position

HEDGING IS A PORTFOLIO OF THE FUTURES

We have strong fund managers and advisors with rich experience in hedging and risk management strategies & very well known about how to hedge a portfolio of stocks in the current market.

INDEXING

A stock index is a specimen or collection of stocks that gives an impression of how a specific part of the stock market is performing. Example, a technology stock index will track technology stocks. The index moves with the overall presentation of the stocks that it holds within it. The index can then be used by investors who want to rapidly meter the recital of technology stocks, either at that moment or over time.

Why Trade CFDs On Indices with Arbitx:

- MT5 Platform leading online trading platform today
- No Swaps or Commissions
- Quick Trading Features
- Transparent Prices
